omarjafarcool@gmail.com

Addis Ababa, Ethiopia

[@amoori01](#)

Professional Summary

Software Engineering with a strong foundation in software development, backend engineering, databases, and system design. Previously earned a Diploma in Information Technology from Admas University. Passionate about building scalable, reliable, and user-focused applications, with hands-on experience developing full-stack web applications. Skilled in designing RESTful APIs, database modeling, version control with Git, and containerized development using Docker. In addition to software development, experienced in IT support, system administration, networking, and UI/UX design, enabling a well-rounded approach to solving technical challenges. Recognized for strong analytical thinking, problem-solving skills, adaptability, and a commitment to continuously learning modern technologies and software engineering best practices.

Professional Experience

Volunteer Services

Embassy of Ethiopia in Jeddah |  Jeddah, Saudi Arabia
September 2021 - December 2021

- Maintain the embassy's social media presence and update the website with relevant information.
- Maintain and update the volunteer database with accurate and current information
- Ensure volunteers are informed about their roles and responsibilities.
- Assist in emergencies involving Ethiopian nationals, such as natural disasters or legal issues.
- Ensure the security and proper functioning of the embassy's IT infrastructure.
- Organize and facilitate language and cultural orientation programs for new arrivals.

IT Support

Berhanena Selam Printing Enterprise |  Addis Ababa, Ethiopia
October 2022 - July 2023

- Troubleshoot hardware and software issues on computers, printers, and other devices
- Manage and maintain servers, including updates, backups, and security patches.
- Assist users with IT-related problems and resolve technical issues promptly.
- Maintain detailed records of IT infrastructure and configurations.
- Troubleshoot network connectivity issues and perform regular network maintenance.

PROJECTS

Network and Internet Infrastructure Proposal | Networking, System Infrastructure

November 2023

- Conducted a comprehensive assessment of existing network and internet infrastructure to identify performance gaps.
- Evaluated multiple infrastructure solutions including networking hardware, software platforms, and service providers.
- Designed an optimized infrastructure proposal focused on improving reliability, scalability, and cost efficiency.

School Management System Platform | Web Application, Database Design

2025 - Present

- Designed and developed a web-based school management system to streamline administrative and academic operations.
- Implemented database structures for managing student records, attendance, and academic information.
- Developed user-friendly interfaces using UI/UX design principles to improve usability and accessibility.

Education

Ethipian International School
 Jeddah, Saudi Arabia
High School Diploma
Sept 2019 - July 2021

Admas University
 Addis Ababa, Ethiopia
Diploma of Information Technology
May 2022 - July 2024

BITS College
 Addis Ababa, Ethiopia
Bachelor of Science Degree in "Software Engineering"
Sept 2024 - Present

Skills

- NestJS
- Next.js
- Git
- GitHub
- Jira
- Rails
- Technical Support
- Docker
- React.js
- Typescript
- Linux
- HTML / CSS
- Python
- Java
- PostgreSQL
- JavaScript
- Vercel
- Network Configuration
- Postman

Languages

- Arabic
- Amharic
- English
- Oromo
